All of our honey is cold extracted, cold filtered and unblended to protect the natural proteins and enzymes that make honey a super food.
Should some granulation occur this is natural process and a sign of its quality. To return it to a liquid state gently warm.
This summer honey is produced from shires of rural England during the time when the honey flow is at its peak and the bees are busiest. The hive has its highest population now and is really buzzing, this ensures the bees are in the best possible condition to produce this premium pure English honey from their harvest of nectar.
This honey is sweeter and has a slightly more robust Flavour. Great for drinks or sweetening your breakfast or wonderful spread on a fresh bread roll.
