Final Comments:						
<p>Light Grade maple syrup is typically harvested early in the maple syrup production season. It has a delicate, pale golden color and a mild, subtle flavor. This grade is often preferred for those who enjoy a more delicate sweetness and want to retain the maple flavor without overpowering other foods or beverages.</p> <p>Dark Grade maple syrup is harvested later in the season. It has a rich, dark amber color and a more intense, robust maple flavor. This grade is often favored by those who appreciate a stronger maple taste and enjoy using maple syrup as a prominent flavor in recipes and dishes.</p> <p>Processing Grade maple syrup does not fit into the grading categories because it doesn't meet the color and flavor requirements for table-grade syrup. It is still a high-quality syrup, but it may be less suitable for direct consumption. Instead, Processing Grade syrup is used in various food products, such as baked goods, sauces, and other processed foods that use maple syrup as an ingredient.</p>
