

200g/300ml MSM / label size 78x210mm

KIKI's MSM Flakes is a naturally occurring organic mineral sulfur from methylsulfonylmethane. Sulfur, often referred to as 'nature's beauty mineral', is found in all living plants and animal tissue and is a vital component for making collagen, the primary element for hair, skin, joints and cartilage. In generic MSM products crystallisation is often used as a purification step, which in turn results in higher water content and blockages that can entrap contaminants. KIKI's MSM Flakes is made from premium quality, highly purified methylsulfonylmethane. It undergoes a unique proprietary four stage distillation process which removes impurities and creates low moisture content, reducing the exposure of microbial contamination and degradation.

Storage: Store in a cool, dry place away from direct sunlight. Refrigeration is not required.

Food supplements should not be used as a substitute for a varied diet. Keep out of reach of children. Do not exceed the recommended daily dose.

Suitable for vegetarians and vegans. Naturally free from gluten and wheat. NO ARTIFICIAL COLOURS, PRESERVATIVES, SWEETENERS OR FILLERS
