

Formula Overview

Bringing together natural botanicals in a playful format, this complex offers a gentle introduction to 5-hydroxytryptophan. Two raspberry flavoured gummies provide 100 mg of 5-HTP derived from Griffonia seed extract, complemented by calming chamomile and lemon balm extracts for a nuanced botanical profile. The gummies are sweetened with cane sugar and tapioca syrup, set with pectin and coloured with natural fruit juices, ensuring a gelatine free texture that’s suitable for vegans. Each serving is precisely measured at two gummies, and the bottle supplies 30 servings in total. The compact, recyclable container keeps the gummies fresh and portable, making it easy to incorporate this supplement into daily habits. Free from artificial additives and made in the EU with non GMO ingredients and produced under GMP standards, this formulation offers a clean, plant based way to explore 5HTP with a mindful, modern sensibility.
