

**Directions:**

Rub a small amount around the rim of both nostrils and the bones of the eyes, but not too close or in the eye. Re-apply regularly and after blowing your nose. This helps trap pollen, dust and pet allergens before they get in. One pot can last a full hay fever season!

**Over 50 Awards!  
Including ALLERGY  
FRIENDLY PRODUCT  
from Allergy UK**

**All ingredients  
selected to be  
suitable for  
pregnant women
