

L405
Pure Collagen 200g - UK
86x253mm

Collagen is the most prevalent protein in the human body, making up skin, bones, muscles, cartilage, ligaments, and connective tissues. Collagen is a protein that holds the body together by forming a bond to provide strength, elasticity, and structure. Unfortunately, collagen production declines naturally as we age. Our grass-fed, free-range, and pasture-raised bovine collagen peptide powder contains type I and type III collagen peptides. Our collagen production process uses cutting-edge technology to ensure a protein with a low molecular weight for increased bioavailability and optimal digestion. This versatile powder has a neutral flavour and smell that mixes easily with any liquid.

Best before end: See base.

Storage: Store in a cool, dry place away from direct sunlight. Refrigeration is not required.

Food supplements should not be used as a substitute for a varied diet.

Keep out of reach of children. Do not exceed the recommended daily dose.

Naturally free from wheat, gluten, lactose and dairy. Paleo and keto friendly.
Non GMO. Hormone, antibiotics and pesticide free.

NO ARTIFICIAL COLOURS, PRESERVATIVES, SWEETENERS OR FILLERS
