Laura Rudoe

FOUNDER, EVOLVE BEAUTY

EVOLVE ORGANIC BEAUTY IS ONE OF THE UK'S LEADING ETHICAL & SUSTAINABLE BEAUTY BRANDS

Our belief that business can be a force for good is at the heart of what we do. We are certified organic, vegan, cruelty free, carbon neutral and a certified B Corp.

Our independent certifications prove that our products are healthier, kinder and greener. B Corp is a certification that a business is a force for good across everything it does.

We are proud to be one of the first 1,000 companies in the UK to become B Corp certified.

FORMULATED & HAND CRAFTED BY US

Our products are made at our studio in Hertfordshire, UK.

Every formula is unique and has been created by us from scratch, and exhaustively tested by our expert team.

We manage the whole supply chain which means we have complete control over where our ingredients come from.

Our products are handcrafted in small batches to ensure maximum freshness and reduce waste.

We create local employment opportunities and are proud to be a certified Living Wage employer.

COSMOS ORGANIC AND NATURAL CERTIFICATION

Your Assurance of Natural, Safe, and Ethical Skincare

At Evolve Organic Beauty, our commitment to producing natural and organic products is at the heart of everything we do. We proudly adhere to the COSMOS Organic Beauty Product Certification, a globally recognised standard that ensures our products meet the highest benchmarks for organic integrity, safety, and environmental sustainability. 93% of our products are certified to COSMOS Organic and Natural standards, 36 Organic and 7 natural.

What is COSMOS Organic and Natural Certification?

COSMOS certification is awarded by the Soil Association in the UK and by ECOCERT and several other providers in Europe. It is an independent verification that a product is truly organic and natural. The % organic and natural must be displayed on pack and all ingredients are checked and must be fully traceable.

Organic Certification

Products with the COSMOS Organic certification contain a minimum of 95% physically processed agro-ingredients that are organic.

Natural Certification

The COSMOS Natural standard meets all the principles of organic certification but doesn't meet the 95% organic ingredient threshold.

All COSMOS products are certified free from:

- Parabens, phthalates and other potentially harmful ingredients
- Most synthetic ingredients, except for a limited number of safe synthetics
- Genetically modified ingredients (GMOs)
- Unsustainable palm oil
- Unsafe plastic packaging that contains BPA

WHY USE NATURAL AND ORGANIC PRODUCTS?

- The average adult uses 9 personal care products a day, exposing them to around 126 different chemicals, some potentially harmful.
- The human skin absorbs up to 60% of what is put on it and it is estimated to take just 26 seconds for some of the chemicals in toiletries to reach our organs.
- Synthetic chemicals such as parabens and phthalates can act as endocrine disruptors and interfere with your natural hormones
- Some synthetic chemicals in skincare can cause carcinogenic contaminants when they react with each other (PEGs, DEA/TEA/MEA, ethoxylated ingredients)
- Many synthetic chemicals can be irritating, especially to sensitive skin.
- Artificial chemicals from skincare add to your body burden of toxins that the liver needs to process. Avoiding them helps with your health more generally.
- Natural ingredients are more biocompatible with the body so they are less likely to cause allergic reactions and also are more easily absorbed by the body.
