Product Description	Maximum Strength Maintains Healthy Nervous System* with Vitamin E & Lecithin Coenzyme Q10 (CoQ10) is a vitamin-like compound that plays a central role in cellular energy production.* CoQ10 is found throughout the body, but is especially concentrated in the heart, liver, and kidney and production has been found to decline with age. CoQ10 works with vitamin E as a potent free radical scavenger in cell membranes, as well as within blood vessels.* Years of scientific research have shown that CoQ10 helps to maintain a cardiovascular system and normal nervous system function.* NOW® CoQ10 is pharmaceutical grade. NOW CoQ10 products contain only the natural, all-trans form of CoQ10 produced by fermentation. Contains no titanium dioxide. Separation and color variation in the softgel is natural and doesn't affect product quality. This product has more CoQ10 (600 mg per softgel) than our regular strength product (60 mg per softgel).
