

MANUKA MIDDLES

Manuka Middles are a soothing Manuka Honey & Lemon Lozenge with Zinc. The addition of Zinc contributes to the normal function of the immune system. At the heart of each lozenge is a runny Manuka Honey centre. Each centre is made with high grade 300mgo Manuka Honey, direct from Manuka Doctor's own New Zealand hives.

Methylglyoxal or MGO for short, is a naturally occurring compound found in Manuka honey and is derived from DHA (dihydroxyacetone) which is naturally present in the nectar of the Manuka Bush. The MGO level is an indication of Manuka Honey's antimicrobial properties.

Manuka Doctor's roots are firmly set in the clean green mountains of New Zealand where our Bee Keepers produce high quality authentic Manuka Honey from our own hives.
