

Chlorella and Spirulina are natural algae that harness energy from sunlight to fuel their growth. We have combined them to bring their individual nutrients together, in one convenient supplement. Our Chlorella and Spirulina are cultivated in pools of freshwater, dried, milled and then pressed into tablets. We use a special process to break down the insoluble cell walls of Chlorella and increase the bioavailability of nutrients.

HELP US SAVE THE RAINFOREST

Rainforest Foods works with Rainforest Concern (charity no.1028947) to conserve threatened forests; protecting endangered habitats, the wildlife and indigenous peoples. For every pack sold, Rainforest Foods will fund the protection of one square metre of rainforest. For further information visit: www.rainforestconcern.org
