

MGO® Manuka honey is labelled on the minimum Methylglyoxal (mg/kg) content, which is tested in a independent UK laboratory to the ISO 17025 standard. MGO® Manuka honey is also tested for Dihydroxyacetone DHA® content, this is necessary to guarantee the Methylglyoxal content across the shelf life of the product.

250g e

Best Before end see side of jar. Store at room temperature.
Unsuitable for infants under 12 months.

MGO® Manuka Honey

300+mg/kg (METHYLGLYOXAL)

DHA® Tested

New
Zealand

DIRECTIONS: MGO® Manuka Honey can be taken as part of a balanced diet or used as a natural sweetener with meals and hot drinks.

Manuka honey will naturally crystallise. Crystals can be melted by slowly warming the honey
