

Organic Oyster Mushroom Extract 60caps - UK
57x170mm - L397

Our organic oyster mushrooms are cultivated on wood-rich substrate, creating a robust, high-quality extract with the highest concentration of bioactive components. Our Organic Oyster Extract Powder is extracted from the mushroom's fruiting bodies, which have been demonstrated to have considerably more active chemicals and polysaccharides, as well as a higher concentration of beta-D-glucans than mushrooms extracted from mycelium. Temperature-controlled technology is used to extract the valuable functional components found inside the mushroom cells; the production technique allows for the collection of the highest amounts of active nutrients. Our pure and concentrated Organic Oyster Extract Powder is expertly standardised to an impressive 50% polysaccharides content.

Botanical Information
Beta-glucan rich polysaccharides 50%

Our extracts are produced entirely from the fruiting bodies of mushrooms (not from mycelium). The fruiting bodies are grown on wood-rich substrate (not on grain) and so are loaded with beta-glucan-rich polysaccharides and other precious functional ingredients.
