## HOW TO REACTIVATE AFTER A PERIOD OF NON-USE:

Soak in water during non-use and  
perform 2 run throughs before  
commencing use.

Household equipment for the treatment of drinking water. The pitcher filters the drinking water from the mains thanks to a cartridge that improves the taste of the water by reducing any unwanted substances that may be present.

Warning: this product requires regular periodic maintenance, including washing the jug and replacing the filter, in order to ensure the potability requirements of the treated drinking water and the maintenance of improvements as declared by the manufacturer.

In the event of a boil water notice or similar emergency, the filtered water should be boiled. Dispose of the used filter media in use when the boil water notice period is over.

# HOW TO SET UP YOUR GLASS V2

SCAN FOR SET UP VIDEO  
OR VISIT [PHOXWATER.COM/SETUP](https://phoxwater.com/setup)

- 1** Unscrew reservoir from glass jar and remove cartridge from reservoir. Wash each component of the jug

- 2** Take out one refill bag and one carbon felt bag from the pack.

- 3** Take out the carbon felt disk and insert into the lid as shown.

- 4** Open up your refill pack and pour into the cartridge.

- 5** Fit the lid securely on to the cartridge.

- 6** Half fill the glass jar with fresh cold water and soak cartridge for 6 minutes.

- 7** Twist the cartridge into the reservoir and fill up. Allow 2 full reservoirs to filter before consuming water.

- 8** Wash out the glass jar, as it may have deposits from step 7.

- 9** When putting your jug back together, make sure you put the gasket back onto the jar to create a watertight seal.

**YOU ARE NOW READY TO USE YOUR V2!**
