LOW-TEMPERATURE  
PASTEURISATION

## Natural Food Supplement

Bovine Colostrum is a natural, nutrient-rich substance produced by all mammals and is the first form of milk. Colostrum has been proven to support microbiome and strengthen gut lining. At Ossa, we source our colostrum responsibly from grass-fed, pasture-raised cows, collecting only surplus supply.

To preserve its powerful bioactive properties, we use low-temperature pasteurisation, ensuring a minimum of 35% immunoglobulin G (IgG), which plays a key role in supporting immune health. Free from GMOs, gluten, and artificial additives, our Colostrum is a clean, natural food supplement designed to support overall wellbeing. With its rich profile of immune-supporting nutrients, it's a meaningful addition to a balanced lifestyle.

### INGREDIENTS

Bovine Colostrum (Milk).

For allergens, see ingredients in **bold**.
