Apiaries®

All of our honey is cold extracted, cold filtered and unblended to protect the natural proteins and enzymes in this premium honey. Our hives are sited among Organically Certified Acacia woodland, during the period of early summer when the wild acacias are in full bloom. This pale and light coloured honey is a real favourite amongst connoisseurs of honey for its purity and light delicate taste. This makes it ideal for use in cooking, as a general sweetener or for spreading. A real favourite amongst children.

Littleover Apiaries are committed to sustainable organic farming while producing this honey and the care of our planet.

All good honey may crystallise or set during storage. If this should occur pleasewarm gently to return to its liquid form.
