

Product

Name	Natural Fluoride Free Toothpaste - Mint
Description	At Kurin we believe that nature has all the powerful ingredients you need for a healthy mouth without the use of harmful chemicals. Our formulas use natural ingredients like Xylitol extract from Birch (or Corn) and Lauryl Glucoside from Coconuts. Ingredients that really work at keeping your smile clean and happy. Free from SLS and Fluoride, our Xylitol formula protects against plaque build-up whilst the natural peppermint flavour keeps breath fresh. Our tubes are 100% recyclable as they are made from only one type of plastic, most toothpaste tubes are made from a laminate of two or more types of plastic, or plastic and aluminium so they can't be recycled. To prepare the tube to be recycled consumers just have to cut the tube open to clean it and then they can put it in the same recycling as they put their plastic milk bottles in. These tubes also use 27% less plastic than the usual laminated plastic toothpaste tubes on the market.
Code	KUR1
Barcode	5055177537922
Country of Origin*	Poland
*Country of origin may vary from time to time and the origin stated in this document is not guaranteed.
