

2 x incognito® refill capsules

These insect repellent capsules for our wood bracelet/anklets help reduce your attractiveness to insects.

Each capsule lasts for 18 days out of the resealable bag by releasing repellent essential oils, using the latest microencapsulation technology.

We recommend these refill capsules and sustainable sourced, handcrafted bracelets are used in conjunction with one of our incognito clinically proven insect repellent biocide products: flagship spray; roll-on; lotion or 3-in-1 30 SPF mineral sunblock - providing complete protection from mosquitoes and many other biting and stinging insects + ticks

What's inside: 2 x insect repellent capsules.

Directions: Insert capsule into the wooden bracelet and use when needed, then replace back into the sealable bag, thus ensuring the natural aroma in the capsules stays fresh. Wear on either the wrist or ankle or attach to your clothing, bag or backpack. Keep the additional capsule in either biodegradable bag & seal to ensure maximum effectiveness and longevity.

Once the fragrance wears off, replace with a new refill capsule. Remove old capsules from the wooden clasp using a pen or similar object. We recommend replacing each capsule approximately every 18 days or as required.

Incognito's handcrafted wooden bracelets can be purchased through our website: lessmosquito.com
