Love & prosperity through community

Certified

Corporation

Prajāva is our philosophy, and that stands for the inspiring way in which a business can work with its communities to create a virtuous cycle of shared value. In return, it delivers a sustainable competitive advantage to everyone in the value chain, including the environment at large. This puts the business in an incredibly strong position to drive ethical, long-term value creation for its customers, employees, and suppliers. As a result, it enables the business to form more fruitful relationships while uplifting everyone's livelihoods and bridging the inequalities in wealth and knowledge.

Love & prosperity through community

We celebrate the world we live in by putting sustainability at the core of all activities as well as only using 100% organic ingredients. We celebrate our 300+ sustainability-minded employee co-owners through empowering programs such as the Big Game. Our small-scale farmers benefit from incentives to grow organic produce, a generous premium on top of fair-trade prices, and initiatives that enhance the wellbeing of their families and communities. We celebrate tea in all its flavourful glory. Honouring tea traditions from England to Sri Lanka and beyond, we've crafted a delicious and, at times, surprising selection of teas. So, you get to enjoy all the regular favourites as well as discover the exciting new blends that make up our beautiful ranges.

For tea lovers, all of this guarantees excellence in everything we do; from sourcing the finest fresh organic ingredients, to our expert employees in Colombo, Sri Lanka and the beautifully packaged tea on your kitchen shelf. Our dedicated designers deserve special mention for the exuberant packaging that shares the joy we take in every step of the tea journey – from planting to pouring. An explosion of colours celebrates the rich, diverse flavours and aromas given to us to enjoy by Mother Nature.

The English Tea Shop was set up in 2010 with a passionate belief in doing things differently by putting people and purpose before profit. Our mantra of 'Love and Prosperity through Community' has acted as a guiding star on the road to success in over 55 markets worldwide. Our growth proves our heart-felt belief that ethical, sustainable businesses can be successful and profitable. We care about enriching the lives of everyone involved from farm to cup; from planters to pickers, processors and packers, to you preparing your favourite cup of tea in the comfort of your own home. All of these wonderful people make up your tea loving community.

In October 2021 English Tea Shop became 30% employee-owned!

We are continually improving how we do things and aim to become the world's leading employee-owned tea company with a unique sustainability model. In 2021, our employee share-ownership increased from 80 core employees owning 15% of company stock to 215+ employees owning 30% of shares.

Join the celebration of uplifting blends that do good, crafted with care by tea lovers like you.

Revolutionising gifting and celebrating togetherness through tea

From the classic blends to creative combinations,
discover teas to enliven the senses and soothe the soul.
Introducing you to our brand new Favourites, Moments
and Exclusive gifting collections. Bursting with colours
and flavours, our all-new gifting collections are
designed and curated for the most exquisite tea
drinking and gifting experience. Make every occasion,
moment and season truly celebratory by bringing
people together in sharing stories, special
moments, and feelgood flavours
with those you love.

Your Everyday Range

20 Tea Bag Sachets

As fans of mother nature, we have made tea bags, boxes and outer packaging in this range fully compostable. Our tea bags are staple-free and sachets are recyclable.

Aromatic Ceylon black tea beautifully balanced with the world's best Ceylon ginger and a sweet, fresh peach flavour.

Refreshing lemongrass combined with the finest Ceylon ginger and citrus for a caffeine-free boost.

Our certifications

CERTIFIED BY - CONTROL UNION/CU
LK - BIO - 149
NON EU AGRICULTURE

CU NO: 804067

EU certification gives a coherent identity to European Union produced organic products which make it easier for the consumers to identify organic products and help farmers to market them across the entirety of the EU. The organic logo can only be used on products that have been certified as organic by an authorised control agency or body. This guarantees that products have fulfilled strict conditions on how they must be produced, processed, transported and stored. EU certification further helps maintain trust in organic food and support the authorities in their inspection regimes.

Soil Association certification offers a huge range of organic and sustainable certification schemes across food, farming, catering, health and beauty, textiles and forestry which are recognised and trusted by consumers and businesses around the world. It also is the UK's largest organic certification body, responsible for certifying over 70% of the growing organic market with over 3,500 farms and organic businesses all over the world. Having the Soil Association organic symbol sends a clear message to an ever-growing number of consumers that the products are environmentally and socially responsible.

USDA certification serves as a road map to help ensure the delivery of an ethical and environment-friendly product according to specific requirements verified by the USA accredited certifying agent. USDA certified products demonstrate that the operations or the processing of the product protect natural resources, conserve biodiversity, and use only approved substances.

Fairtrade is an alternative approach to conventional trade based on a partnership between producers and traders, businesses and consumers. The certification assures to connect disadvantaged farmers and workers with consumers, to empower them to combat poverty, strengthen their position and take more control over their lives, protection of workers' rights and the environment. It also enables consumers to directly play a part in uplifting farmers' lives.

VegeCert and the Toronto Vegetarian Association work together to formulate its high standards. They ensure that all products are 100% free from all animal products and by-products including dairy and eggs. Going vegan is not just a health booster but also paves the path to reduce the environmental impact on our planet.

BRC is the British Retail Consortium, established to harmonize food safety standards across the supply chain. Being the most popular standard under the Global Food Safety Initiative (GFSI) makes sure that the rules prescribe quality, safety, and operational guidelines to ensure that manufacturers fulfil their legal obligations and provide protection for the end consumer.

Japanese agricultural standard (JAS) strives to ensure that organic foods are produced by processing methods utilizing physical and biological functions, avoiding the use of chemical, synthesized additives, and chemical agents in the manufacturing and processing process.

AB, "agriculture biologique", a certification offered by The French Ministry of Agriculture and Fishing, fulfils the EU regulations for organic food. Organic products that carry the logo contain more than 95 percent organic components, and be produced or processed within the EU, and were certified by one of the authorised inspection bodies.

The Non-GMO Project is a nonprofit organization committed to preserving and building sources of non-GMO products, educating consumers, and providing verified non-GMO choices. The Non-GMO Project's Standard requires that all verified products have systems in place for testing, traceability, segregation, formulation, labelling and quality assurance.

Kosher certification supports changes and trends in the food and beverage industry. It guarantees that each ingredient, food additive and processing aid used in the production of a particular product identify the absence of meat, fish and dairy products.

The Halal certification guarantees that the product and services aimed at the Islamic population meet particular requirements of Islamic law. The use of Halal logo on products guarantees that the products are manufactured or processed according to Codex Alimentarius Commission.

ISO 14001 is intended for use by organizations that seek to minimize the environmental footprint. It certifies that all environmental issues fulfil compliance obligations and risks and opportunities relevant to its operations, such as air pollution, problems of water and sewage, waste management, energy consumption, soil contamination, climate change mitigation and adaptation.

ISO 22000 standards aim to eliminate the risk of Biological, Chemical & Physical hazards throughout the entire food supply-chain process and outline the relevant procedures required to meet international food safety standards. The ISO 22000 certification guarantees that products and services are safe, reliable, are of good quality while facilitating free and fair global trade.

The Demeter certification ensures all products are not just organic but biodynamic as well. Organic and both Biodynamic are grown without chemicals and GMOs, but Biodynamic goes a step further, it applies a holistic approach and the main difference is that biodynamic farming uses different principles that add vitality to the plant, soil, animal or livestock and consider these as a single system and uses specifically prepared preparations made from minerals and herbs, incorporates astrological influences of the moon and other planets for gardeners and farmers when planting and harvesting crops.

English Tea Shop

ORGANIC

A Sri Lankan tea story infused with British traditions. From the rich and robust to the delicate and fragrant, every cup of English Tea Shop tea celebrates our vibrant community and heartfelt commitment to sustainability.
