1) Spray a light even mist over affected areas. Allow the sprayed areas to dry thoroughly. 2) Repeat if necessary. Spray at least 30cm away from the target area. Do not spray directly on to fabrics. It is advisable to spray bedding several hours before sleeping on the surface where the solution has been applied.

Spray a light even mist over affected areas. Allow the sprayed areas to dry thoroughly. Repeat if necessary.

Press and turn the nozzle to activate the spray
