## Marketing Information

### Key Description (Max 250 characters)

- Replete Intensive is a high potency blend of the unique, clinically researched LAB<sup>4</sup> complex of live bacteria designed for intensive, 7-day use

### Key Bullets

- Replete Intensive is a high potency blend of the unique, clinically researched LAB<sup>4</sup> complex of live bacteria with *Lactobacillus salivarius* designed for intensive, 7-day use
- Clinically researched – The LAB<sup>4</sup> complex is one of the most clinically-researched combinations of live bacteria, consisting of two specific proprietary strains of *Lactobacillus acidophilus*, along with *Bifidobacterium bifidum* and *Bifidobacterium lactis*
- Effective – Contains 130 billion per daily intake of the clinically researched LAB<sup>4</sup> & *Lactobacillus salivarius* strains used in multiple clinical trials
- Optimum support – Useful when a high potency, intensive dose of live bacteria is required
- Advanced – Human compatible strains that are bile and acid resistant and stick to the gut wall
- Guaranteed potency – 130 billion potency to end of shelf life
- Optimum stability – Contains a superior, high tech ‘molecular sieve’, which is a form of desiccant that absorbs moisture, keeping the bacteria fresher and stable for longer
- No unnecessary additives and dairy free
- Flexible – 7-day supply designed for intensive use, in an easy-to-use powder
- Suitability – Can be taken alongside of after antibiotics
- Environmentally friendly – Recyclable packaging
- Trusted – We’ve been helping to shape a healthier society for over 30 years
- Suitable for vegetarians and vegans
- 7 days’ supply at 20g per day

### Key Health Claims (supporting marketing text)

- Label: N/A

### Suggested Combinations

- Take alongside Oregano Complex for gastrointestinal support

### Product Updates

- Packaging update – now in glass recyclable packaging
- Shelf life has increased to 18 months from 15 months
- Now contains a superior, high tech ‘molecular sieve’, which is a form of desiccant that absorbs moisture, keeping the bacteria fresher and stable for longer
