

Best Basic Care with Q10

Your gentle essentials for hydration, skin care and protection against glycation.

Coenzyme Q10 complex reduces wrinkles and protects against glycation, offering dual action against premature skin ageing.

How sugar damages the skin

Sugar binds to essential skin proteins. The skin loses firmness, regenerates less effectively and ages more rapidly. The anti-glycation effect¹ reduces sugar-induced damage, preserves the skin structure and keeps skin smooth and resilient.

Simply good

Visibly reduces fine lines

Intensely moisturising

Fragrance-free and specially formulated for the delicate eye contour

Clearly good

97%² confirm: Gently smooths the delicate eye contour
