

Organic mushroom decaffeinated coffee - UK  
63x185mm - L393

Our Organic Mushroom Decaffeinated Coffee is a blend of organic 100% decaffeinated Arabica coffee and functional certified organic mushroom extracts: Lion's Mane, Reishi and Maitake mushrooms, all of which are extracted from the fruiting bodies. All mushrooms have been grown as nature intended, on nutrient-rich wood or vegan substrate yielding powerful and high-quality extracts which have been standardised to 30% beta-D-glucans polysaccharides, the most important compound in mushrooms. We use temperature-controlled technology to obtain the valuable functional components found inside the mushroom cells; the advanced production method supports the highest levels of active nutrients to be captured, resulting in full spectrum extracts. Our coffee is decaffeinated using the Swiss Water Decaf Process, a method of decaffeinating coffee that is both chemical-free and 99.9% effective at removing caffeine without sacrificing flavour. Our Organic Mushroom Decaf Coffee blend is the perfect way to enjoy the taste of coffee whilst avoiding caffeine.

**Botanical Information**

Beta-glucan rich polysaccharides 30%

Our extracts are produced entirely from the fruiting bodies of mushrooms (not from mycelium). The fruiting bodies are grown on wood-rich substrate (not on grain) and so are loaded with beta-glucan-rich polysaccharides and other precious functional ingredients.
