Littleover Apiaries®

All of our honey is cold extracted, cold filtered and unblended to protect the natural proteins and enzymes in this premium honey. Our hives are carefully sited in organic registered 'wild flower' meadows during the spring and summer months. This is to ensure that our bees are in the best possible position to gather their harvest of nectar to produce this perfect natural honey.

Littleover Apiaries are committed to sustainable organic farming while producing this honey and the care of our planet.
