

incognito®

Large handcrafted wooden-bead bracelet

Circumference: min 50mm. - max 85mm.

The state of the art micro-encapsulation technology provides excellent local protection from mosquitoes, midges, horseflies, fleas, & many other biting/stinging insects + ticks for 18 days or more for each capsule!

Our beautiful bracelet/anklets are simple yet cleverly designed to help protect you from biting insects including mosquitoes without using toxic synthetic chemicals. Your handcrafted wooden-bead bracelet is kind to the planet because of its refillable, reusable nature, biodegradable bag and carbon capturing sustainable wood. Which is just as well because wrists and ankles are often the most targeted areas for mosquitoes! Also available in medium size.

We recommend this handcrafted bracelet is used in conjunction with at least one of the incognito insect repellent biocide products: spray, roll-on, lotion or 3-in-1 + 30 SPF mineral sunblock to provide top-to-toe total protection from mosquitoes and other biting and stinging insects.

For further cutting-edge information & tips visit: **avoidingbites.com**

What's inside: incognito wood-bead bracelet with capsule included in the central clasp plus 1x additional refill capsule. Simply push out the capsule with a pen or similar object & pop in a fresh one every 18 days the bracelet is out of its bag.

Directions: Wear when needed, then put back into the bag, ensuring the natural aroma in the capsules stays fresh. Wear on wrists and/or ankles or attach to your clothing, bag and/or backpack.

Keep the additional capsule refill in its biodegradable plastic bag until needed to ensure its effectiveness and longevity.

Once the fragrance wears off, replace with a refill capsule. Remove the old capsule using a pen or similar object. We recommend replacing each capsule after approximately 18 days or as required.

Replacement capsules can also be purchased through our website:
