

Balmonds Cooling Cream: a natural lotion for hot & bothered skin

with aloe vera, lavender + menthol

The Balmonds Cooling Cream USP

Made with a base of fairly traded organic shea butter and enriched with omega-rich hemp and olive oils, this is a natural moisturising lotion for skin that needs both hydration and calm! Lighter in texture than our Daily Moisturiser, Cooling Cream gives a mild cooling sensation on the skin, making it a great choice as a natural aftersun. Use it to rehydrate and nourish after sun exposure, to smooth any rough or flaky areas, and minimise peeling.

Free from synthetic fragrances and scented only with gentle natural lavender essential oil, the cream is also suitable for skin prone to rosacea, hormonal flushes, hives or prickly heat. The formula is non-comedogenic and can be used all over the body, including the face.

Balmonds Cooling Cream is 99% natural, cruelty-free and Vegan Society certified

Key Ingredients

Aloe vera: to give a natural soothing sensation after sun exposure

Menthol: feels gentle and cooling to refresh flushed skin

Lavender: known for its calming properties

Shea butter: supports the skin barrier, softening & conditioning dry skin

Hemp: exceptionally rich in Omegas 3 & 6 to nourish and moisturise dehydrated skin

Calendula: rich in nutrients to support skin cell regeneration

Nettle: nutrient-rich and naturally anti-inflammatory herbal tincture

Chickweed: contains high levels of beta-carotene, vitamin C and bioflavonoids

100 ml:
RRP £21
