8. Process Information

All ingredients are subject to a sampling and testing regime upon intake. Ingredients are scanned then decanted into a blender and mixed for the required amount of time. The blended recipe is put over the weigher heads and is gravity fed to a form and seal machine. The packs are passed through an x-ray. Sensitivities are 5mm glass, 2mm stainless steel, 2mm non-ferrous, 2mm ferrous. The finished product is packed in to the carton and outer case, which are then stacked on a pallet. When the pallet is full it is wrapped with shrink wrap, labelled and scanned. The wrapped pallets are then stored at room temperature.
