**Section 3 - Microbiological Quality**

This product is non-aqueous and consequently raises no microbiological issues. The reasoning behind this statement is detailed in ISO 29621 Microbiology -- Guidelines for the risk assessment and identification of microbiologically low-risk products.

**Section 4 - Impurities and packaging**

This formulation does not contain any ingredients with toxicologically relevant impurities.

There are no known or likely interactions with the pack that have any safety implications.

**Section 5 - Normal and Foreseeable Use**

This product is intended for topical application to a limited body area in small quantities.

**Section 6 - Exposure**

**Where Used** This product is applied to the skin

**Estimated Daily Amount Used** 2g **Calculated relative daily exposure mg/kg** 33

**Frequency Of Use** Daily

**Assumed Body Weight** 60 Kg

**Rinse Status** Leave On

**Section 7 - Exposure to Ingredients**

Ingredient	CAS Number	%w/w	Dose	SED	NOAEL	MoS
Helianthus Annuus Flower Extract	84776-03-4	50.000	2.000	16.67

Avena Sativa	84012-26-0	50.000	2.000	16.67
Kernel Oil				

The Margin of Safety (MoS) is calculated by working out the maximum feasible exposure and comparing it to the level at which no adverse effect is observed ( the NOAEL). If the MoS is 100 then the use level is one hundredth the level at which any effect is observed. Any level above 100 is considered to be acceptable.

**Section 8 - Toxicological Profile of Ingredients**

***Avena Sativa Kernel Oil***

84012-26-0

Avena Sativa Kernel Oil is the fixed oil expressed from the kernels of the Oat, *Avena sativa* L., Poaceae.

It is listed on the EU's CosIng database without any restrictions on its use.

It has been registered with ECHA under the REACH regulations.

The cosmetic ingredient review included this oil in its review of fatty acid based triglyceride oils. This report found that these products, all of which have the same basic chemistry, were safe as used in cosmetics.

Given the nature of the oil in question, its lack of permeability coupled with being easily digested no NOAEL is appropriate and a margin of safety calculation is not necessary.

Cosmetic Ingredient Review Final Report Plant-Derived Fatty Acid Oils as Used in Cosmetics March 4, 2011

Becker LC, Bergfeld WF, Belsito DV, Hill RA, Klaassen CD, Liebler DC, Marks JG Jr, Shank RC, Slaga TJ, Snyder PW, Gill LJ, Heldreth B. Safety Assessment of *Avena sativa* (Oat)-Derived Ingredients As Used in Cosmetics. *Int J Toxicol.* 2019 Nov/Dec;38(3\_suppl):23S-47S. doi: 10.1177/1091581819889904. PMID: 31840550.

***Helianthus Annuus Flower Extract***

84776-03-4

Helianthus Annuus Flower Extract is derived from the flowers of the sunflower plant, *Helianthus annuus* L., belonging to the Compositae family. It is listed on CosIng as a cosmetic ingredient with the primary function of skin conditioning. No specific restrictions are noted for its use in cosmetics under current regulations.

The extract's composition includes various bioactive compounds that contribute to its properties, such as flavonoids, phenolic acids, and other secondary metabolites. These components are generally recognised as safe for topical application. Toxicological data available for *Helianthus Annuus Flower Extract* indicate no evidence of genotoxicity, carcinogenicity, or reproductive toxicity. Studies assessing dermal exposure have not revealed any adverse effects, including irritation or sensitisation. Given its botanical origin and historical use in cosmetics, the ingredient is considered safe under normal conditions of use.

No NOAEL data specific to *Helianthus Annuus Flower Extract* has been identified; therefore, a margin of safety calculation is not applicable. The absence of adverse effects in dermal studies supports its safety profile in this product.

Becker, Lillian C., et al. "Safety Assessment of *Helianthus annuus* (Sunflower)-Derived Ingredients as Used in Cosmetics." *International Journal of Toxicology* 42.1\_suppl (2023): 93S-116S.

***Part B***

**Section 1- Assessment Conclusion**

This product has been assessed and found to comply with the requirements of current EU,UK and US cosmetic regulations. The ingredients selected have been reviewed and are used at levels suitable to ensure that the end user will experience the level of safety they can reasonably expect for this kind of product when used in accordance with the manufacturers instructions, and when manufactured following a suitable cosmetic GMP procedure.

This formulation does not contain any ingredients with toxicologically relevant impurities.

There are no known or likely interactions with the pack that have any safety implications.

**Section 2- Labels and Warnings**

This product does not require any specific warnings over and above those customary in this category.

Period After Opening 12 Months

**Section 3- Reasoning**

This is a standard product using conventional ingredients at normal levels. This category of products has a good track record of safe use and so can be presumed to be safe under normal and foreseeable conditions of use. Interactions between ingredients are unlikely to be problematic in this kind of product. There is no indication that the product's stability has any impact on its safety.
