Atlantic Sea Salt

The Environment

- This salt is raked by hand from coastal sea pans.
- Harvesting does not involve the use of any vehicles for extraction and therefore minimises the cost to the environment.

Traditional Harvested
Sea Salt Crystals

- Harvested by hand from the Atlantic shores of Portugal.
- Uses the same technique that the Romans used there centuries before.
- The salt crystals maintain the same form that nature gave them.

Dried only by the sun and
wind, crystals retain some
natural humidity.
