

Between the East African savannas and the  
Mounts were the mythical source of the Nile.

The lower slopes of the mountains are characterized by a mild and unique terroir which permits to grow exceptional and very distinct vanilla and a single origin cocoa with a very fruity aroma. **Mountains of the Moon™** stands for pure and exceptional products, produced in harmony with nature and in a way that is lasting & fair, a philosophy that our company follows since four generations. Our cocoa and vanilla is grown on the own plantation and by over 1000 small farmers. It is certified organic and fair trade "Fair For Life®". To assure impeccable quality farmers are trained to pay due attention to land, terrain and micro-climate to best match site, crops and agronomy and only healthy and mature fruits are harvested.

The fair and transparent cooperation with the farmers helps to assure that farmers and their families earn a decent living and can build their future on organic farming of cocoa and vanilla.

### Grand cru single origin domaine Monts de la Lune, Mutwanga, North Kivu province, Dem. Rep. Congo.
