

ZINC AMINO ACID DRINK POWDER

REZCUE™ is a unique combination of Zinc, L-Carnosine and L-Glutamine that work in synergy together when dissolved in a drink. Taken in liquid form, compared with tablets and capsules, the active components are delivered more efficiently to where they are needed most.

DIRECTIONS: Mix one scoop (2.5g) of powder with your favourite beverage twice daily - in the morning and evening. Take on an empty stomach.

PRECAUTIONS: Do not exceed the stated recommended daily dose. Food supplements should not be used as a substitute for a balanced and varied diet. Keep out of the reach of young children.
