Our 50% sea moss extract is a concentrated, bioavailable form of wild harvested sea moss (*Chondrus Crispus*), known for its rich mineral profile and health supportive properties. The "50%" refers to the high concentration of active sea moss compounds extracted using a water based method that preserves its most beneficial nutrients without the use of alcohol or harsh chemicals.

Our unique extract allows for more consistent dosage, enhanced stability, and a smoother flavour profile, while retaining the core benefits of raw sea moss in a form that's easier to blend into our beverages without the bulk of the raw gel.
