

**DID YOU KNOW 15% OF GLOBAL GREENHOUSE
GAS EMISSIONS COME FROM DEFORESTATION?**

That's why we partner with small scale coffee growers who are protecting and regenerating forests - planting trees and safeguarding ecosystems that make great coffee possible.

With your help, we invest in nature regeneration at the grass roots level and in some of the world's most unique ecological hotspots.

Good for coffee farmers, good for forests, good for the future.
