spermidine 60caps - UK
57x170mm

5 106018 151657 >

Spermidine is a polyamine that occurs naturally in many different foods. It is a polycationic compound that helps keep cells running smoothly and has a role in various cellular processes. Our spermidine capsules are made from carefully selected, 100% pure, natural, non-GMO wheat germ, which has been expertly developed to increase the bioavailability of this essential nutrient. For those on an intermittent fasting regime, our spermidine supplement should be taken after the last meal.

Best before end: See base. **Storage:** Store in a cool, dry place away from direct sunlight. Refrigeration is not required.

Food supplements should not be used as a substitute for a varied diet. Keep out of reach of children. Do not exceed the recommended daily dose.

Suitable for vegetarians and vegans.
NO ARTIFICIAL COLOURS, PRESERVATIVES, SWEETENERS OR FILLERS
