**TOTAL
WIN-
WIN!**

Oatly was founded on the simple idea of bringing change and transparency to existing food systems that are currently responsible for about a third of all global greenhouse gas emissions, roughly half of which come from the animal-based food sector. Our thought was to offer oat-based options so amazing and enjoyable to experience, that you wouldn't feel you had to compromise when choosing them over conventional animal-based products. This of course could potentially trigger a shift to a world where we all work together to protect the viability of this amazing planet we live on. If any of this makes sense, then give this product a try and if not well perhaps you could also give this product a try and see if you like it for what is, which if you do, would mean a total win-win for everyone.

OAT DRINK**

“SHAKE
ME!”

**WE
ONLY
KNOW
OATS**

We don't know anything about almonds or soy or cute farm animals. All we know is oats. Specifically, how to turn the best ones into a liquid drink so that you can take them home and enjoy them whenever you feel you need them in your body. It was our original idea in the early 1990s to create a viable alternative to milk from oats and it is our idea to continue to make the best, most amazing liquid oats that you will find anywhere. We trust that you are cool with that.
