No artificial colours, preservatives, sweeteners or fillers.

Naturally free from wheat, gluten, lactose and dairy. Non - irradiated and non GMO.

Storage

Store in a cool, dry place away from direct sunlight. Refrigeration is not required.

Wild- Caught

Collagen is the most abundant protein in the human body and is the component of skin, bones, muscles, cartilage, ligaments and connective tissues. Collagen is the substance that holds the body together and forms a bond to provide strength, elasticity and structure. Unfortunately collagen production naturally depletes as we age and this reduction of collagen levels in the skin is the main reason for the formation of lines and wrinkles. Our Pure Marine Collagen Powder is made from 100% purified hydrolysed collagen, it is enzymatically processed to keep the peptides intact. Collagen polypeptides are fully digestible and gentle on the gut due to their low molecular weight.

Benefits

- Helps increase collagen production
- Support healthy skin structure
- Fully digestible, gentle on the gut
- Excellent absorption and bioavailability due to smallest particle size and lowest molecular weight among all collagen types
- No fish smell, completely flavourless

Taste

KIKI Health's Pure Marine Collagen is unflavoured, easy to mix and completely tasteless.

Processing

Produced from raw fish skin extracted from sustainably sourced wild fish, such as cod, haddock, plaice and pollock, off the coast of France by a responsible MSC certified fishery. The fish are sourced solely from their natural habitat and never from farms.

Country of origin France
