

Green Origins

ORGANIC CHLORELLA POWDER

Chlorella is a natural, green algae which harnesses energy from sunlight to fuel its growth. Chlorella cells have a tough outer wall, which limits the availability of nutrition. Our chlorella is cultivated and harvested in pure, freshwater pools. High-impact jets then break down the cell walls before it's dried into a naturally nutritious powder.

OUR SHARED EARTH INITIATIVE:

We search the world for the most nutritious foods, source from producers who use organic methods and guarantee that at least 10% of our profits each year support social and environmental projects around the world.

WHY NOT TRY A GREEN BOOST SMOOTHIE?

- 1 tsp chlorella powder
- Large handful of leafy greens (kale, spinach, lettuce)
- Half a cucumber
- 1 grapefruit (peeled)
- Half an apple
- Half a lemon
- Knob of fresh ginger

Squeeze the juice of the lemon, and grate the lemon zest and the knob of ginger into a blender.

Peel the grapefruit and add to the blender. Add the rest of the ingredients and blend. Serve as a smoothie, or sieve out the bits and enjoy over ice as a juice.
