Legislation/References:						
<ul style="list-style-type: none"> • Honey (England) Regulations 2015 No. 1348 • EC Directive 2001/110/EC relating to honey • EC Directive 2008/772/EC on the approval of residue monitoring plans submitted by third countries in accordance with Council directive 96/23/EC • Commission Regulations (EU) No. 37/2010 on pharmacologically active substances and their classification regarding maximum residue limits in foodstuffs of animal origin. • CODEX Standard for Honey 12-1981 • Regulation (EC) No. 1935/2004 on materials and articles intended to come into contact with food. • Commission Regulation (EU) No. 10/2011 on plastic materials and articles intended to come into contact with food. 						
Final Comments:						
<p>Due to the natural properties of honey, it is perfectly normal for it to crystallise over time. It is recommended that honey is stored at the optimum temperature to slow this natural process. Crystallisation is not a quality issue and the honey is still perfectly edible. The crystallisation can easily be reversed by warming the honey short term to break up the crystals and return the honey to its clear liquid state.</p>
