

A clear glass jar filled with small, irregular, yellowish-orange granules of bee pollen. The jar is shown from a slightly low angle, with the pollen filling the frame above and below the central text area.

Ingredients: Natural Premium Bee Pollen.

Non GMO. A blend of EU and Non EU pollen, packed in the UK.

From the Beekeeper: Field-gathered flower pollen is collected by bees and is the primary food source for the hive. Bees collect pollen in sacks attached to their back legs and on a nice day you can often see their colourful pollen filled sack as they fly back to the hive where they store the pollen in the honeycomb.

Sprinkle on cereals, mixed in yoghurt or add to smoothies.
