Instructions for use

Use/Handling	Please follow the instructions precisely when preparing infant formulae. Incorrect preparation or keeping the prepared bottle for a longer period of time can lead to health impairments, e.g. because of the growth of undesirable bacteria. Clean bottle, teat and ring thoroughly.
Breastfeeding information	Important notice: ...on your baby's nutrition. Breastfeeding is the best for your baby. Please talk to your clinic or your paediatrician if you want to use an infant formula [for FSMP special formula].

Preparation

Please make sure that the lid and protective foil are still intact before using the product. Before opening, shake the sealed bottle well. Pour the required amount into a feeding bottle and warm up to 40°C. Please do not warm up formula in the microwave (risk of scalding!). Allow it to cool down to drinking temperature (approx. 37°C) – check temperature before feeding. Feed immediately and dispose of leftovers.
