SOOTHING CERAMIDE CLEANSING MILK

Launching on: 01/09/25

RRP: £18

99.5% NATURAL, 52.9% ORGANIC

Transform the every day act of cleansing into a moment of comfort and care with new Soothing Ceramide Cleansing Milk. This fragrance-free and certified organic gentle face cleanser is designed to clean, soothe, and restore sensitive skin.

With its refreshing milky texture, this daily cleanser blends nourishing ceramides, microbiome-balancing prebiotics, and soothing botanicals to gently remove light makeup and impurities without stripping the skin barrier. Skin is left feeling clean, comforted, and balanced after every use.

At the heart of the formula are Ceramides, essential lipids that help rebuild and reinforce the skin's natural barrier. Northern Truffle extract offers powerful soothing benefits, helping to reduce heat stress, discomfort, and visible signs of sensitivity.

Soothing Ceramide Cleansing Milk has also been formulated with Prebiulin FOS, a naturally derived prebiotic that works to rebalance the skin's microbiome within just four hours promoting long-term skin health and resilience.

Packaged in a 100ml sustainable sugarcane, travel-friendly tube, this organic and skin-kind cleanser is perfect for all skin types, particularly those prone to sensitivity and reactivity.

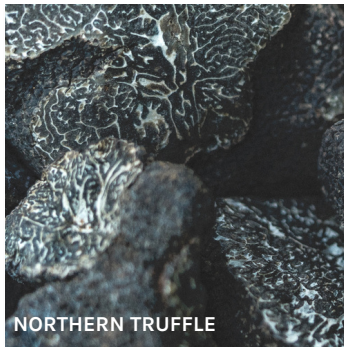

Every cleanse, a gentle return to balance.

CERAMIDES

NORTHERN TRUFFLE

CHICORY ROOT

KEY INGREDIENTS:

CERAMIDES: Skin-identical ceramides, produced through a patented bio-fermentation process, that mimic the structure of those found in human skin, ensure they help refill the lipid barrier efficiently. These essential lipids replenish and reinforce the skin's barrier, helping to lock in moisture, restore resilience, and support dry, compromised skin.

NORTHERN TRUFFLE EXTRACT: Derived from the *Albatrellus ovinus* mushroom, also known as Northern Truffle, this natural ingredient helps soothe skin and reduce skin discomfort by inhibiting the TRPV1 receptor associated with irritation and heat stress.

PREBIULIN FOS PREBIOTIC: Sourced from Chicory root, this natural, clinically proven short-chain inulin-based prebiotic helps rebalance the skin's microbiome within just 4 hours. By selectively feeding beneficial bacteria, it restores a healthy skin barrier, soothes sensitivity, and helps defend against redness, irritation, and blemishes.
