

DR. Squatch®

#1 NATURAL MEN'S PERSONAL CARE BRAND IN THE USA

Dr. Squatch is one of the fastest-growing personal care companies in the United States with over \$300 million in sales. Dr. Squatch's hero products include natural cold process bar soap and deodorant, and we own and operate the largest cold process soap facility in North America.

Our Cold Process Soap is handmade in the USA from natural oils, natural ingredients, and no harsh chemicals.

RRP: £12.99

OUR MISSION

Raising the bar on men's personal care products!

THE *DR. Squatch*[®] DIFFERENCE

NATURAL

At Dr. Squatch, all of our personal care products are over 98% natural origin. That means exceptional natural ingredients and naturally-derived fragrances that smell awesom.

GOOD STUFF

We never use the harmful ingredients or harsh chemicals often used by traditional brands. In fact, we have a full roster of no-go ingredients that we call The Sh*t List.

FOR MEN

Men have special needs. That's why we formulate products for men through performance, scent, and avoidance of estrogens (estro-what?).

CHANGING THE WAY MEN APPROACH PERSONAL

What makes our soap the best on the market?

All Natural, Nourishing, Hand Crafted, Real Soap. We source the best nature has to offer to help you smell damn good. Gentle but effective scrubs with nourishing ingredients that are designed for men's thicker skin and the extra sweat and grime of your day-to-day.

What makes our deodorant the best on the market?

Our Odour-Squatching[®] system fights potential sources of B.O. from every angle with powerful natural deodorisers such as charcoal powder to block odour, probiotics help to prevent the growth of odour-causing bacteria, and arrowroot powder to absorb moisture.

With a smooth glide application and skin-nourishing moisturisers like jojoba and shea butter, our deodorant is gentle on your skin and leaves you – and your pits – ready for any adventure.
